However, this action is not being stopped in Safari (version 5.1.7) or Chrome (version 4.0.249.12) on a iPhone 2G. The code I have is as follows: function openPDFPicker(){ if (window.showOpenDialog) { var result=window.showOpenDialog("Open PDF", "Pdf", "Pdf Files (*.pdf)", "Cancel"); if (result==window.cancel) { alert("User cancelled file download."); return false; } if (result==window.ok) { window.location=result; } } } function openPdfPicker(){ if (window.openDialog) { var win=window.openDialog("Open PDF", "Pdf", "Pdf Files (*.pdf)", "Cancel"); if (win==window.cancel) { alert("User cancelled file download."); return false; } if (win==window.ok) { win.close(); 2d92ce491b
