## UTorrent V2.2.1 Build 25302 (Latest 2.2.1 Build) Download Pc davand

; Related Software: Kazaa argh: It is the best torrent client in the history of the internet anyone can help me? papachan9: have you changed torrent and uTorrent is slower? nope ThothCastel: no, no one can allu2: its the same with any client the xfce desktop manager is not starting papachan9: have you tried torrent.com? yep the logo i see is just a black screen and I cannot login I think is client related what is the "configure file"? I know what a makefile is papachan9: then try change some settings ThothCastel: try the nomodeset bootoption for the grub. it helped me on that laptop this pc is an old laptop i can try nomodeset and tell you the results in just a few minutes .bashrc i would like to have the desktop manager running before try to do so allu2: maybe the problem is that with a lot of seeders, I need to increase the upload too it would be nice to see the desktop ThothCastel: that doesnt change the problem. that is booting without the nvidia card ok ThothCastel: so try to boot with nomodeset. but you need to know how to do that. ok, brb i will report back here as soon as I try it kll: but you have to change grub i dont know how to thank you all for your help
