Once a conversation has started or a new topic has been broached, there's no end to the number of topics you can discuss. That's why many people rely on various applications to find suitable topics to discuss in their local chat groups. In that sense, the potential topics for discussion is endless. That's what makes this application, In This Topic, a key tool for conversations. Simple to use In order to use this application, you need to specify which key should be monitored. The app can monitor all keys at once or just the ones you want. Next, you can choose exactly which information should be displayed on the screen. You can choose between the number of lines for the statistics, the number of items for the categories and whether the current topic should be displayed or not. You can also customize the colors and font. As with many other applications, you can control the rest of the interface using hotkeys. The app is very easy to use, and also very portable. You can launch it from your desktop or from a portable media. The application supports all major keyboards, including the Trackpoint, Microsoft Comfort Keyboard and Bluetooth. In addition, In This Topic also features a number of built-in categories, such as Games, Cars, Culture, Weather, Nature, Current Events and Business, and you can set them as your default categories. Once you've set the default categories, you can sort the topics in those categories by pressing a button in the top-right corner. All of the above can be customized, so you can easily alter the colors, sizes and positions of the interface elements. This application can run on your desktop, but you can also install it to your mobile phone to save space. Support for several languages As mentioned before, In This Topic is entirely

What's New In?

TopScore is an unofficial, open-source utility that helps you easily record and share your gaming stats. After launching the program, you just need to select your game and specify whether you want to record gameplay, or only the keystrokes you are making. You can select the output format you want to use: compressed video files, OGG, MP3 or PDF. The program also keeps track of your multiplayer statistics and displays them in an easy-to-read format. The game progress and your high scores can be seen in real time, and you can track your speed and compare it with your friends' scores. Last but not least, TopScore has a built-in benchmark feature, which allows you to measure your FPS, FPS history and more. While playing in offline mode, you can save your session to a file and transfer it to other computers. You can also output data to Twitter and Facebook accounts. [OS Features] The GUI is neatly organized, and each task can be performed by pressing one or more hotkeys. The program has numerous options to increase your PC's performance, enabling you to optimize the most important aspects of your game. You can change the colors of your PC, or monitor its temperature. [Software Features] One of the most interesting features of this application is that it lets you transfer your gaming data from one computer to another. This is very useful if you want to transfer your save data to a laptop, for example. After transferring the data, the application will save a screenshot of your current desktop, and you can easily transfer it to another computer via FTP. The application also has an easy-to-use benchmark feature. This lets you test your FPS, or FPS history, which is very useful when playing online. If you want to share your top scores with your friends, this program can save a record of your games and your high scores. It also saves statistics and data that can be exported to a PDF file. [System Requirements] Windows 7/Vista/XP/2000/2003, 64bit (AMD or Intel) 1GB RAM, 2GB free disk space Speed Screenshot Capturer is an open-source application for Windows that captures screenshots from video files and records FPS. It's a very easy to use application that takes only seconds to configure and no installation is required.
