

Remember the times when you couldn't possibly forget something. You've always left your keys behind, accidentally left your wallet in the sink, or forgotten your groceries at home? With the help of ORememberMe, you can finally be reminded of your tasks and events. From now on, you'll never forget to do things like remembering birthdays, appointments, and coming home from work. What It Does: ORememberMe is a simple to use software solution that you can use to set up reminders. This way, you can keep track of important upcoming tasks and events, such as birthday celebrations, meetings, appointments, grocery shopping, and so on. Doesn't need installation The entire tool is packed in a single.exe file that can be saved anywhere on the computer and directly launched. Since ORememberMe is portable, you can also copy it to a USB flash drive to run it on any PC without setup. Set up one-time or recurrent reminders The main window has a simple look and structure, showing all options in plain sight. To create a new task, you can specify the display name, description, date and time, as well as make it a one-time event or repeat it on any selected days of the week. It's possible to create as many tasks as you want, edit their properties or empty the list. After setting up tasks, you can minimize the app to the systray and carry on with your typical desktop activity. Pops up a message and plays an audio alert When time's up, ORememberME displays a popup message in the center of the screen and plays a brief audio alert to draw your attention. It reveals your reminder's description and gives you the possibility to enable snooze mode by asking the program to remind you of the same message again in any number of minutes. Interface needs more work Unfortunately, the interface looks a bit rudimentary. For example, the columns with the task names, dates, times and other information make ORememberME look like it's an unfinished project. We must also keep in mind that it hasn't received updates for a while. Conclusion All things considered, ORememberME proves to be an easy-to-use program for setting up one-time or current reminders. It was light on system resources usage and worked without errors on the newest Windows version in our tests. However, it has little to offer. Update link-

What's New In?

Set up one-time or recurrent reminders, pop-up message and play an audio alert. Postoperative mixed-type hypocalcemia secondary to parathyroid hormone-related protein-associated ectopic hyperplasia of parathyroid glands in rats. Mixed-type hypocalcemia due to ectopic parathyroid hyperplasia is rare. In the present report, we describe a case of mixed-type hypocalcemia secondary to ectopic parathyroid hyperplasia in a rat model, and discuss the pathological characteristics of this disease. After the second surgery for removal of parathyroid tumors, a 4-month-old male Lewis rat showed severe hypocalcemia accompanied by an elevation of serum parathyroid hormone (PTH) levels. The serum intact PTH level was 74pg/ml, which was more than 10 times the normal value. A histological examination of the excised parathyroid tumors revealed hyperplastic changes. Accordingly, the hypocalcemia was diagnosed as hypoparathyroidism secondary to ectopic hyperplasia of parathyroid glands. In the literature, mixed-type hypocalcemia associated with ectopic parathyroid hyperplasia has been reported in humans, but not in experimental animals. To the best of our knowledge, this is the first report of mixed-type hypocalcemia secondary to ectopic hyperplasia of parathyroid glands in a rat model. We report this case to help clinicians to understand this disease and manage it properly in patients. Baccarat Mary, a lovely fully grown 88 year-old lady passed away this afternoon at The Kenny Institute in Wheeling after fighting against the odds to live into her nineties. A survivor of the Great Depression, a prolific artist, a best friend to many and a beloved member of the Art League of Wheeling and Southwestern West Virginia since 1985, Mary was a real musical extravaganza with operatic voice and impeccable timing. Her sudden death will leave us in deep mourning and grieving for her family, friends and the world of music she shared with us. Mary and her husband Lee, Virginia and two of their daughters were good friends and fellow artists with Billy and Joy Rogers when the couple began their basement recording studio and recording company. We will miss Mary's voice and her "mood swings." And Lee and Mary have never made any secret of the fact that Billy and Joy Rogers were the spirit behind their successful business.
