Word processing software Fortunately, your word processing program should be one of the very few applications you need. You probably have a standard program like Microsoft Word or maybe a program that runs on Macs as a cheaper alternative to Word, like Pages. Whatever the program, if it has a basic spell check and an auto-correct function, you're good to go. If you're a visual person who relies on your imagination to convey your message, perhaps you'll need to learn how to use a program like Illustrator (for artistic design) or Adobe InDesign (for layout), but there's really no need to master these programs unless you plan to design or create professional publications or Internet sites.

The effect of 2,3-bis(2-chloroethyl)-1-nitrosourea (BCNU) on the activity of mouse tumor antiviral interferon. 2,3-Bis(2-chloroethyl)-1-nitrosourea (BCNU), a drug which has been shown to exert a paradoxical antitumor effect on various human tumors, was administered daily to mice for 1 week following infection with 100 PFU of herpes simplex virus type 2 (HSV-2) on the left foot pad. Bedding soaked in BCNU or distilled water was applied immediately prior to infection. Experiments were terminated when the development of footpad lesions was observed in the BCNU treated mice. Tumors, lymph nodes and spleen were removed for virus isolation. The day of death or termination of the experiment was considered day 0. The results indicate that the presence of BCNU in the environment diminished the response of the mouse to footpad infection with HSV-2 by a factor of 1.5. Moreover, even animals infected without BCNU treatment and sacrificed at day 7 had a high degree of resistance (day 0-7 footpad tumor: uninfected 16 +/- 3 mm, infected 20 +/- 2 mm, P greater than 0.05). The in vitro effect of BCNU on mouse antiviral interferon was also examined. The sensitivity of NIH/NRC/3T3 cells to antiviral interferon was greatly diminished by concentrations of BCNU (5 x 10(-5) M) sufficient to inhibit cell growth (41-83% inhibition). Thus, the observed effect of BCNU on the immune response of the mouse was attributed to the immunosuppressive rather than the antitumor effects of the drug.
