This Canon MP Navigator EX is a powerful application, giving you a comprehensive set of functions so that you can handle your multifunction printer (MFP) like a pro. There is no longer any need for you to call support for the operation of your MFP. Now you can just go ahead and do it on your own. Furthermore, you can configure your MFP from your computer using this application and make it work optimally. What's more, you can make sure that your MFP is working perfectly by sending it instructions. Canon MP Navigator EX is not just for customers who own Canon products. It can be used by those who own MFPs from Canon and other brands as well. The manual will help you with all the settings you need to make your MFP work as you want. Whether you are looking to print photos, save scanned documents or scan documents, all the settings you need are here. Canon MP Navigator EX for Canon PIXMA MP640 is dedicated to those who own a Canon printer, allowing them to conduct common printing and scanning tasks much easier. Developed by Canon itself, this particular application is mainly dedicated to the PIXMA MP640 model, but it also works with peripherals from the MP990 series. The goal of this application is to assist you in quickly configuring your new printer and send it instructions from the computer, rather than using the hardware's controls. While Canon products are equipped with intuitive functions, having a software do all the job allows you to get the most out of the device and obtain high-quality output. You can use this utility to access the scanner and quickly acquire images. Its interface comprises clear and intelligible usage instructions, allowing even beginners to carry out a task without facing difficulties. The scanned document can be previewed using Canon MP Navigator EX for Canon PIXMA MP640 and the operation can be reloaded if you are not satisfied with the initial result. The final output can be either saved to your computer as a multi-page PDF document, printed with the PIXMA MP640 printer or sent via e-mail to your inbox for safe keeping. The built-in OCR engine enables you to quickly extract text from an acquired image and the image editing options help you enhance your pictures before saving them locally. Canon offers this package as a solution for situations when the user lost or misplaced the original CD that comes bundled with the PIXMA MP640 printer. Its feature

What's New in the?

Canon MP Navigator EX for Canon PIXMA MP560 is a solution that has been developed in order to ease and speed up the process of printing and scanning your documents and photos. This app comes with a very simple interface allowing even beginners to use its functions without any difficulties. Focused on the PIXMA MP560 model and no other Canon printer, this utility was developed by Canon in order to provide its users with all the tools that are needed to take advantage of the printer's capabilities. A wide range of options is available to make your work even easier. This app will allow you to automatically configure the printer and quickly perform the most common tasks, such as printing, scanning, and sending documents to the e-mail box. To facilitate your work, the application allows you to preview the scanned documents, making sure they are of high quality. This way, you can improve them before saving the final copy locally or directly to your computer. The built-in OCR engine enables you to instantly extract the text from an acquired image and the image editing options are available to enhance your pictures before saving them locally. Canon MP Navigator EX for Canon PIXMA MP560 Features: - Convert documents in a single print-scan-email process - Easily configure printer's settings - Scan and preview document at the same time - Automatically corrects background and text - Extract text from scanned documents - Change settings with a single tap - Single copy and single scan, multiple people and multiple copies possible - Send documents by e-mail - Easy set-up and intuitive interface - Plug & play with Windows XP, Vista, and Windows 7 - No CD required I was a little leery at first to try this application. I used this version of Canon MP Navigator to configure the previous PIXMA MP540 printer I bought and this software worked great. However, the version of Canon MP Navigator EX for Canon PIXMA MP660 that I bought to try with this PIXMA MP560 printer did not recognize it and threw me into a complete panic. Anyway, since the software finally recognized my printer (and since it is the only way I can configure my printer) I can now print any documents or photos I want, even though I have yet to figure out how to use the software. An electrophoretic display is a non-emissive device based on the electrophoresis phenomenon of charged pigment particles suspended in a solvent. The display usually comprises two plates with electrodes placed opposing each other. One of the electrodes is usually transparent and may be referred to as the viewing substrate. A suspension composed of a colored solvent and charged pigment particles is enclosed between the two plates. When a voltage difference is applied between the two electrodes, the pigment particles migrate to one side and either the color of the pigment or the color
