Screenshots: FreeCabinets is a program that allows you to easily create a virtual disk that holds all your computer's files and folders in one single place. This way, you can easily access your important files, or you can use it to backup and store all the important data on your computer. Each virtual disk is stored inside a single file called a cabinet, which is stored inside another cabinet. To create a new cabinet, just start FreeCabinets, and then click the "New cabinet" button. You will be asked to name the cabinet, and to choose the drive where you want to save the cabinet file. Each virtual disk also has a virtual folder, which is used to organize all your files

and folders. If you want to, you can add any folder to the virtual disk. You can also add and delete files from the virtual disk just like you would add and delete files from any other folder. If you want to, you can also create a backup copy of your virtual disk. Just select the "Backup" option, and then you will be presented with a window where you can select the drive where you want to save the backup. Each virtual disk can also be opened by double-clicking its cabinet file. Once the virtual disk is opened, it will look similar to any other folder or disk drive, and you can start using it as if it was any other drive. If you want to, you can also share your virtual disk with other people, or you can encrypt the data before sharing it. FreeCabinets is completely free, and it's a useful tool for anyone who needs a simple, yet effective way to backup and store all their files.
