HandyTimer Crack+ Keygen For PC

HandyTimer is a desktop and portable application designed to help you keep track of time spent on different tasks, keep track of the date and time, set up alarms, as well as work with a stopwatch and a countdown timer. HandyTimer is designed to be a versatile tool that allows you to use time logging features that often come in a complex time and billing package. In short, the program lets you make use of a stopwatch, and countdown timer, plus features like the alarm clock, calendar timer, total hours worked, and much more. The application lets you manage your time more efficiently so you don't need to set up separate timers to keep track of the time spent on various projects. You can work with a text timer and set different parameters like the duration, date and time, the number of repetitions, the sound notification (choose between the available options from a drop-down list). The program comes with a customizable interface that allows you to set up various functions, and numerous timers at the same time. HandyTimer gives you the possibility to log the time spent on each project from a single list (you can add new projects at any time), keep an eye on the time for every project, as well as copy all the current information into various workbooks and charts. You can also log the time spent on each project (and on all of them if you'd like) directly in a single text file. The application comes with the possibility to view the current time displayed in hours, minutes, and seconds, and directly display the date in the main window. Plus, you can work with a stopwatch and start, stop, pause, and resume it. Configure alarms HandyTimer offers you the possibility to set up multiple alarms in order to remember important events. You can specify the exact time in hours, minutes, and seconds, and a day of the week. Plus, you can play preset sound notifications (you may choose between available options from a drop-down list), and repeat alarms several times. Time all sorts of activities HandyTimer provides the tools necessary to collect time spent on different tasks, and you can easily pause and resume the recording. The program allows you to manually time-spend some or all types of activities (stop a program by pressing the Stop button, start counting the time, stop the timer by pressing the Play button, copy the time spent to the clipboard, or copy the information to a text file).
