Sothink Flash Downloader For IE [Win/Mac]

Sothink Flash Downloader for IE is a very small and unobtrusive Internet Explorer extension which allows you to download SWF files directly from the currently loaded website in just a few clicks. When you click on the Sothink Flash Downloader for IE icon, it pops up a splash window with the chosen file name and a separate window to show Flash content from the current website. Simply select the file and click Save, and your Flash data are directly downloaded to your computer. The extension does not replace the original content of the website, i.e. it is not a browser plug-in, but a stand-alone Internet Explorer add-on that does not modify the original files but merely downloads the specified SWF files. Once downloaded, the SWF files are stored in a separate folder, and you can run them as you wish and view them with any appropriate media player or web browser. Sothink Flash Downloader can be used with any single Flash file, but it is recommended that you load only one file at a time as it may cause high resource usage. Although it does not alter the original files, we recommend that you remove downloaded SWF files from your browser at once and delete them from your computer once you are done viewing them. Sothink Flash Downloader for IE Pros: ⬜ Works with all Flash-based websites! ⬜ Very small in size, does not alter the original files, ⬜ Clean, intuitive interface ⬜ Works easily and effectively even for inexperienced users Sothink Flash Downloader for IE Cons: ⬜ The extension performs best with text-based content ⬜ Flash banner ads or other non-text content may have problems ⬜ Sothink Flash Downloader for IE features a 'Save to Desktop' option, which is not optimal for most users. ⬜ Some websites may have issues with running SWF files ⬜ We have not been able to test the utility on older versions of Internet Explorer or other browsers, i.e. we do not know if it will work with them. ⬜ You can only download one SWF file at a time. ⬜ The program is not suitable for novice users because it does not offer any user-friendly interface to control its downloading options In this Sothink Flash Downloader for IE Review we reviewed all the pros and cons of this downloadable tool.
