I have text

that has a medium font size. I would like the text to be fairly readable on the whole page and at all zoom settings. How do I do this? A: The issue is that the content is too small to be fully readable on a page. Try changing the font size of the content by adding these lines: `$('.content').css("font-size", "14px");` for a regular font and `$('.content').css("font-size", "17.5px");` for a font with a slightly larger stroke.
